## Product Diagram

## Specifications

Model	PA-X09
Input / Output	AC 125V 15A 60Hz
Total AC Power Output	1875W
USB Power Output	5V 2.4A total
Energy Absorption Rating	380 Joules
Dimensions	67 x 66 x 66mm / 2.6" x 2.6" x 2.6"
Weight	474g / 16.72oz

## Getting Started

1. Plug the PA-X09 into a wall outlet
2. Connect your electrical and electronic devices to the AC outlets and USB ports on the PA-X09 for power
3. Unplug your devices when fully charged or not in use

## FAQ

### How does the 'Surge Protection Button' work?

The surge protection button is pressed in by default. While the power strip is connected to power and the button remains pressed in, surge protection is active. The power strip will be sacrificed as designed during a power surge to save your connected equipment, but may not protect your devices from surges and spikes in the future if they exceed the energy absorption rating. If the power strip's

protection system is triggered by a surge or other power fault, it will cut power and the surge protection button will pop out. To reset, disconnect & reconnect the power strip; then press the surge protection button. If this doesn't work, replace the power strip.

## **Product Care & Use**

- Keep it away from liquids and extreme heat
- Designed for indoor use only
- Only use with properly grounded outlets
- The power demand of connected devices must not exceed the total AC power output
- Unplug the product during thunderstorms
- If the power strip cuts off power (but your power circuit is operating correctly), try disconnecting & reconnecting the power strip; then make sure the surge protection button is pressed in (see FAQ above)

## **Warranty & Customer Support**

For questions, support, or warranty claims, contact us at the address below that corresponds with your region. Please include your Amazon order number and product model number.

Amazon US orders: [support.us@aukey.com](mailto:support.us@aukey.com)
