#### Specifications

Model	CC-Y11
Technology	Power Delivery 3.0, Quick Charge 3.0
Input	DC 12V-24V
USB-C Output (Power Delivery 3.0)	5V 3A, 9V 2.3A, 12V 1.7A
USB Output (Quick Charge 3.0)	5V 3A, 9V 2A, 12V 1.5A
Total Power Output	17W (21W using USB-C port only)
Dimensions	41 x 25 x 25mm / 1.61" x 0.98" x 0.98"
Weight	13g / 0.46oz

#### What is Power Delivery?

USB Power Delivery is a new, universal multi-voltage charging standard that dynamically negotiates power output over a USB Type-C connection to safely and efficiently recharge a wide range of compatible devices.

#### What is Quick Charge 3.0?

Charges compatible devices up to four times faster than conventional charging. Quick Charge 3.0 is engineered to refuel devices twice as fast as Quick Charge 1.0 and is up to 36% more efficient than Quick Charge 2.0. Backward-compatible with Quick Charge 2.0/1.0 devices.

- 02 -

#### To get USB Power Delivery, the following are required:

- Device (phone, tablet, laptop) that supports USB Power Delivery
- USB-C charger with USB Power Delivery
- USB-C to C cable or Apple USB-C to Lightning Cable

#### Getting Started

1. Insert the CC-Y11 into your vehicle 12V/24V power outlet
2. Connect a charging cable (not included) to your device charging port
3. Connect the other end to the appropriate USB output port on the CC-Y11
4. Unplug your devices when fully charged

#### Product Care & Use

- When using both ports at the same time, they won't fast charge. In this case, the total output of the car charger will be 5V 3.4A (17W)
- USB-C output with Power Delivery supports fast charging for iPhone XS / XS Max / XR and other compatible models when used with original Apple USB-C to Lightning Cable
- It's normal that the CC-Y11 may get a little warm during charging
- Keep away from liquids and extreme heat
