What is USB Power Delivery?

USB Power Delivery is a new, universal multi-voltage charging standard that dynamically negotiates power output over a USB Type-C connection to safely and efficiently recharge a wide range of compatible devices.

To get USB Power Delivery, the following are required:

- Device (phone, tablet, laptop) that supports USB Power Delivery
- USB-C charger with USB Power Delivery
- USB-C to C cable or Apple USB-C to Lightning Cable

- 03 -

Getting Started

1. Plug the PA-D3 into a wall outlet
2. Connect a charging cable (not included) to your device charging port
3. Connect the other end to an output port on the PA-D3
4. Unplug your devices when fully charged

Note

- USB-C output with Power Delivery supports fast charging for iPhone XS / XS Max / XR when used with original Apple USB-C to Lightning cable.
- The USB-C port can output 60W Power Delivery on its own. When both ports are used, the USB-C port outputs up to 45W Power Delivery.

Product Care

- Keep away from liquids and extreme heat
