Specifications

Model	CB-C70
Interfaces	USB Power Delivery port 2 USB 3.1 Gen 1 (USB 3.0) data ports HDMI port
Connector	USB-C
USB Power Delivery Input	DC 5V–20V 5A (up to 100W Power Delivery for a compatible computer)
Maximum Wireless Output	10W (when a laptop and power adapter are both connected)
USB Data Port Output	DC 5V 900mA Max
USB Data Transfer Speed	Up to 5Gbps
HDMI Display Resolution	Up to 4K@30Hz
Materials	Zinc alloy, ABS
Cable Length (connector excluded)	110mm / 4.33"
Dimensions	92 x 92 x 16mm / 3.62" x 3.62" x 0.63"
Weight	148g / 5.57oz

Getting Started

1. Plug the hub into a laptop USB-C port with USB Power Delivery. The LED status indicator will light up red
2. Connect the hub to a wall outlet with the USB-C power adapter and USB-C to C cable that came with the laptop
3. Connect USB peripherals (like mouse, keyboard, and flash drive) and HDMI display to the hub
4. Put your Qi-compatible phone centrally on the hub. The LED status indicator will turn green and your phone will charge wirelessly

Note

Your phone will Fast Charge wirelessly if it's Wireless Fast Charging-compatible. Other Qi-compatible phones will charge at standard wireless charging speed.

Wireless Charging for Non-Wireless-Charging Phones

Wireless charging receiver (not included) required for non-wireless-charging phones.

LED Status Indicator

Indicator	Status
Red	Standby
Flashing Red	Charging error
Green	Charging
Blue	Fully charged

Product Care & Use

- Connect this hub to your host device first before connecting other devices to the hub
- Use your laptop's original power adapter to charge your laptop via the USB Power Delivery port on this hub
- Plug the hub into your laptop and connect your laptop's original power adapter to the USB Power Delivery port on the hub for fast wireless charging. The wireless output is up to 10W when the hub is connected to your laptop and power adapter or up to 5W when only the power adapter is connected
- When connecting an external hard drive or multiple devices to this hub, connect your laptop's power adapter to the USB Power Delivery port on the hub first because your host device may not deliver the required power
- The maximum current output of each USB 3.1 Gen 1 data port is 900mA. These ports are not recommended for charging due to lower output
- USB 3.1 Gen 1 ports may interfere with 2.4GHz wireless devices (like wireless mice and keyboards)
- Keep away from liquids and extreme heat

Warranty & Customer Support

For questions, support, or warranty claims, contact us at the address below that corresponds with your region. Please include your Amazon order number and product model number.
