Thank you for purchasing the AUKEY PA-D01 Surge Protector with 5 AC outlets and 2 USB ports. Please read this user manual carefully and keep it for future reference. If you need any assistance, please contact our support team with your product model number and Amazon order number.

This Surge Protector is designed to protect connected equipment from damaging electrical surges and spikes by both absorbing excess energy and safely redirecting excess energy to the electrical ground of your wiring system.

How does the ‘Protected’ indicator work?
The green Protected indicator shows that surge protection is active. If the PA-D01 is on but the Protected indicator is off, surge protection may not be functioning. The Surge Protector may have been sacrificed (as designed) during a power surge to save your connected equipment, but will not protect against future surges and spikes. If disconnection and reconnection does not reset it, replace the Surge Protector.

Product Care & Use
- Designed for indoor use in homes and offices only
- Do not use for industrial and other very high-demand applications
- Only use with properly grounded outlets
- Do not plug into another power strip or extension cable
- Disconnect if during thunder storms
- Keep it away from liquids and extreme heat
- Replacement recommended after a serious power surge or several years of use
- Protected indicator stays on briefly after switch-off due to normal capacitor discharge

Warranty & Customer Support
For questions, support, or warranty claims, contact us at the address below that corresponds with your region. Please include your Amazon order number and product model number.

Amazon US orders: support.us@aukey.com
Amazon EU orders: support.eu@aukey.com
Amazon CA orders: support.ca@aukey.com
Amazon JP orders: support.jp@aukey.com

*Please note, AUKEY can only provide after sales service for products purchased directly from AUKEY. If you have purchased from a different seller, please contact them directly for service or warranty issues.
