How to use?

1. Program The Remote Control Outlet

1) Open the back cover of the handhold remote control to install the included battery.

2) Plug the remote control outlet into AC wall outlet, and press the button on the outlet, LED indicator will turn on.

3) Press and hold the button on remote control outlet for 3 seconds until LED indicator flashes slowly, then press any desired number button (ON or OFF) on the handhold remote control, the outlet's LED indicator will flash quickly for 2 seconds. The socket is now programmed to the corresponding number you selected on the remote control.

4) Additional remote control buttons(up to 5) can be added to control additional outlets simultaneously.

2. Remotely Control the Electrical Appliance

1) Press the programed ON / OFF button on handhold remote control to turn on or turn off the electrical appliance plugged on the remote control outlet.

2) Press the ALL ON / OFF button on handhold remote control to turn on or turn off all electrical appliances plugged on the remote control outlet at once.

3) Press the button on remote control outlet to turn on or turn off the electrical appliance.

3. Reset Single Button Operation

1) To reset a numbered button on the remote control for an individual outlet
Press and hold the button on remote control outlet for approximately 7 seconds, the LED indicator on the outlet will blink slowly, quickly, then slowly, and the individual outlet will be reset and decoupled from the remote control.

2) Reset all outlets once
Press and hold the ALL OFF button on the handhold remote control for approximately 7 seconds, the LED indicator light on the outlets will start blink quickly, then slowly, then all remote control outlets will be reset.

3) To re-program any or all of the outlets, please resume the programming process from step 1.
