4 Output	5V/2.4A*4(Max 6A)
Dimensions	99*57*31.5mm
Weight	155g

What is AiPower Technology?

Smart:

It is smart enough to automatically recognize each connected device and be compatible with it.

Fast:

Detect your device to provide the maximum possible charge speed.

Safe:

Ensure the safety of the wall charger and devices through the comprehensive protection circuitry.

Getting started?

1. Plug the PA-S11 to the wall socket.
2. Connect your devices to the USB ports.
3. Connect UK standard plug to the built-in socket.
4. Remove devices and the charger from the socket when the charging is finished.

Q&A:

1. The max output of the port with AiPower is 2.4A, can I use AiPower port to charge my device that input is only 1A?

Yes, the AiPower technology will identify automatically the input current your device needed to provide the maximum possible charge speed.

2. What should I do if the PA-S11 can not charge my devices?

- Check the charger to ensure current and voltage meet the requirements of your devices.
- Check the connection between the charger and power socket is secure.
- Check the connection between the charger and your devices is secure.
- Check the charging cable is compatible your device or not.

Caution:

1. Not waterproof. Please keep away from water, liquid and moisture as well as fire, direct sunlight and extreme heat.
2. It is normal that the PA-S11 maybe a little warm while charging devices.
3. When your device is run out of the battery and power off, some devices may be charged a little slower at beginning because of the battery protection from your device.
4. We suggest you to use the original charging cable came with your mobile device(not included) to protect your device when you use PA-S11.
