Getting Started
The PA-X06 is designed for use over a standard duplex (two socket) wall outlet.
● Plug the PA-X06 into a wall socket
● Connect your electronic and electrical devices to this outlet for power
● Unplug your devices when fully charged or not in use

Night Light Operation
When the PA-X06 is plugged in and its light sensor is receiving low ambient light input, the LED night light will be on. The light also helps to locate and illuminate the wall outlet in the dark for more convenient use. Press the night light on/off button to turn on/off operation of the light in these low-light conditions.

Phone Stand Use
While charging, conveniently place your device on the phone stand area on top of the wall outlet.

Product Care & Use
● Designed for indoor use only
● Only use with properly grounded outlets

● Do not overload. The power demand of connected AC appliances should not exceed the maximum AC power output
● Do not plug into another power strip or extension cable
● Unplug your devices during thunderstorms
● Keep it away from liquids and extreme heat
